

Mirror Unit SONIC RIVERS

FMRCD 618

On one of the particularly hot summer days in Cologne in 2019, we met to record the music for our duos second album

During our session the temperature in the small but fine cinema (Hall of the cultural centre Alte Feuwache) rose continuously and reached truly tropical conditions by the time of the evening concert

For this CD we have now chosen those sonic rivers that evolved during the 'melting point' of the day, so to speak, with a few unintended sounds leaking in from the cultural centres courtyard contributing in their own way to this evenings special atmosphere
