The CRUX of the matter refers to the most important part of an ISSUE

It is also the latin word for a CROSS

So in itself we can find a metaphor for an intersection of musical paths,
only trading in the most essential dialogue possible

We attempt to live this practice in our day to day habits
With our thoughts and actions

Sometimes we attempt it with instruments in a farm out buildings in Ditton Priors.
surrounded by livestock and with people we call friends.

Why we do it or for whom or for what this is for is unimportant.
the CRUX of the matter is that WE CARE about doing it

and we keep trying to achieve something that can't be measured or rewarded
